LEGACY DOCK4-5

Our timeless, maintenance free vinyl design. With looks this good, your shoreline will never be the same.

DOCK PLANNING.....6-7

Explore the flexibility, creativity, and longevity when you choose a Bulmann Dock System.

DREAM DOCK8-9

The newest dock system to the Bulmann Family! Unprecedented customizability combined with multiple methods of installation gives you the power to bring your dream shoreline to life.

EQUIPMENT ACCESSORIES.....10-11

Enhance your lakefront experience. Equipment upgrades add special functionality to your dock.

DOCK FURNITURE.....12-13

Enjoy your dock days to the fullest by adding chairs, benches, storage boxes, or cosmetic upgrades.

**PERSONAL WATERCRAFT LIFT (PWC)
& SMALL BOAT LIFT.....14-15**

The 1,300 lb. personal watercraft lift and the wider 1,500 lb. small boat lift are the sturdiest lifts of their size. NEW - PWC High-Lift.

HYDRAULIC DOUBLE PWC LIFT.....16-17

The most user friendly PWC lift ever! Launch and land your PWC at the push of a button.

VERTICAL LIFTS.....18-19

Manual winch driven lifts are great for shallow water conditions. Available in 2,500 & 4,000 lb. capacity.

CLASS I VERTICAL HYDRAULIC LIFTS.....20-21

Remote controlled and solar charged. It doesn't get any easier! Available in 4,000, 6,000 and 7,500 lb. capacity. NEW - High-Lift variants.

CLASS II VERTICAL HYDRAULIC LIFTS.....22-23

Bigger boats need bigger lifts. Enjoy the convenience of our hydraulic systems in capacities from 10,000 to 40,000 lb.

BOAT LIFT ACCESSORIES.....24-25

From guide systems and canopies to bird stop posts and key locks, option your boat lift to make the most of your summer days on the lake.

CANOPIES.....26-27

An in depth look at our canopy options and the accessories that go along with them.

BULMANN LEGACY DOCKS

TRIED AND TRUE

Bulmann Legacy Dock has been in production for 20+ years. The design has been so reliable that on our home lake, Lake Charlevoix in Northern Michigan, there are customers still using 20 year old sections. Designed to last, look beautiful, and add function with accessories, Legacy Dock will forever change how you use your lakefront.

STURDY CONSTRUCTION

Bulmann Docks are the sturdiest portable docks on the market. We have specially designed every part of our Legacy Dock System to have the best strength to weight ratio possible. The aluminum extrusions and the vinyl decking are engineered explicitly for our dock system. Each dock section has internal supports linking all of the planks together. The invisible support works similarly to how rebar works in concrete.

ELEGANT DESIGN

As a waterfront homeowner, being able to enjoy your view is a big part of lakefront living. The first thing you'll notice about our Legacy Dock is it's aesthetic. We have given careful consideration to minimize the amount of visible hardware and structure, which results in an unmatched clean appearance and simplistic style.

VINYL DECKING

Bulmann Docks feature an industry-best, 2" thick, maintenance-free vinyl decking. We tread each plank with a stylish non-skid diamond pattern. The pattern is cut into the surface with round cutters, which eliminates any sharp edges making it easier to clean. The vinyl decking doesn't conduct heat, so it stays cool even on the hottest summer days. Also, it's much quieter than aluminum decking. Colors include white, gray, and tan.

ALUMINUM FRAME

The aluminum structure makes the dock lightweight and maintenance-free. A standard 4'x10' Bulmann Dock top weighs only 110 lbs. and an average leg stand weighs only 25 lbs. Every leg stand has conventional braces welded in place for superior strength. The stylish anodized aluminum side rails will not tarnish or oxidize, keeping your Bulmann Dock looking good as new!

*Industry leading 5/20 dock warranty!
Bulmann Dock & Lift offers the best dock
warranty in the industry. See dealer or
manufacturer for details.*

HARDWARE COMPONENTS

Bulmann Dock & Lift uses stainless steel, aluminum, and silicon bronze for all bolts, nuts, and screws. This combination of top quality material prevents corrosion, making adjustments trouble-free.

SUPERIOR MODULARITY

One of our design goals for Legacy Dock was easy installation and removal. Start by placing the dock top onto the leg stands and secure with our user-friendly tab lock pins. Leg stands are also adjustable by loosening the set screws and telescoping the leg in and out until it is at the appropriate length. Perpendicular sections and some accessories attach to our innovative hangers. Hangers connect to the side rail bolt slots without drilling any holes. These bolt slots allow multiple fixtures to be moved or added to your dock, making it truly modular. If and when it's time for the removal of the dock, pull out the pins and carry or float the dock tops to shore. Being able to remove the legs makes handling the sections more manageable and takes less room to store.

DESIGN FLEXIBILITY

Let your imagination run free! Our dock system is so modular that almost any configuration is possible. Legacy Dock tops come in 4' and 6' widths. Available lengths are 4', 6', 7', 8', or 10' as well as left and right angle sections. Dream Dock is available in widths of 3', 4', and 5'. Lengths are 4', 5', 8', and 10'. Our side rail bolt slots make setting up easy and rearranging the dock without drilling possible. The bolt slots are also used to install most accessories.

DREAM DOCK

Dream Dock combines 25 years of industry experience with the ideas and interests of our customers and dealers. This section dock gives you the ability to tailor your dock to your preferences and needs.

The Flip N' Clip

Step 1

Place deckless dock section into saddles upright.

Step 2

Tip in the dock section.

Step 3

Flip N' Clip the cams, locking in the section from moving.

Multiple Installation Methods

Dream Dock can be installed in a variety of ways. Carry them out in the water, Flip N' Clip them in from the top, or even have your local dealer place them with a fork barge. Use whichever method works best for your lakefront home.

VIDEOS

Decking Options:

Vented (Sunwalk) available in tan and grey.
Marine Board available in white, grey, and tan.

Leg Stand Break Down

Hinge Assembly

Leg stands will lock into the dock tops with no tools required. The sections can disassemble with ease, leaving a smaller footprint for storage over the winter.

No Visible Hardware

A top-down view of consecutive sections looks like one seamless section. The dock shows no visible hardware from the sides and has no uneven or unsightly poles sticking up above the dock.

Modularity

Adjust your layout as you please. Connection saddles mount to leg stands or in the accessory rail to create finger piers or patio sections. You can adjust slip direction, overall length, and move accessory placement

Tool-Less Leveling

Adjust the leg length of your dock with ease. Star knobs keep the inner leg locked into the outer leg. Bring your level, and you'll be sitting on an even dock in no time!

YOUR DREAM IN ACTION

1

To install, follow the Flip N Clip instructions on the front page. Place your decking panels and repeat until your system is complete!

2

Add any of our accessories into the accessory rail. We have furniture, fishing rod holders, and more in stock for your dock.

3

After removing decking panels, simply unclip and lift to remove. This motion breaks suction. Pick up the section and walk it back to shore!

4

No other sectional system will store as simply as Dream Dock. Unhinge the legs and place them in the section for stacking!

Above: Dream Dock System with Double PWC, and Class I Lifts.

Below: Dream Dock frames and legs stacked for seasonal storage.

Equipment Accessories

Equipment accessories provide additional functionality to your dock. For example, solar lights can make using it at night easier. We split them into stability, utility, accessibility, and decking protection.

Stability

The modularity of our dock allows us to provide stability through numerous methods. The proper combination of additional stability depends on your lake bottom. Your local dealership can help you determine your needs.

<i>Additional Stability</i>	<i>Description</i>
Standard Brace	Connects the legstand to the dock top to provide front to back support.
Deep-water Brace	Connects the sides of a legstand to provide additional side to side support in deep water applications.
High Wind Auger Tie Down System	Covered by our vertical bumper posts, the auger system keeps the dock system in place year round in high wind areas.
Mudshoes	An alternative footpad for very mucky and muddy lake bottoms.

Utility

Solar Light

Made from durable materials, these can be mounted on dock tops or on a post to save deck space.

Power Pedestal

Gain a water and electric hookup at the end of your dock with one of our Power Pedestals!

Fold Down Cleat

Give boats the ability to moor on your dock safely by adding a fold down cleat to your dock.

Utility Channel

Hide the hookups for your power pedestal under the dock using our mountable utility channels.

Accessibility

Make your dock easier to use with these accessories.

Staircase

Large steps, sturdy handrails, & adjustable footpad length. 3 to 9 step sizes. Great for people and paws!

Swim Ladder

Leg length adjusts to reach the lake bottom. No drilling required, comes in 3, 4, and 5 step.

Step Down Bracket

Change elevation one section at a time.

Dock Guide Step

Gives you another stable point to board a boat.

Decking Protection

Bumpers - These soft vinyl bumpers protect both your dock and any boat that may be mooring.

Bird Stop Posts -

Pictured below, our bird stop posts provide a place to secure bird line, discouraging waterfowl from landing on it.

Integrated	Vertical	Corner
Soft horizontal vinyl bumpers that install without hardware!	Mounting with side bolts into the accessory track. Also mounts the high wind auger system.	Pair with integrated bumpers to fully cover your dock.

Seating

Cafe Set - This 3-piece set includes swivel chairs, a center table with umbrella slot, and support mounts that cross the entire dock section.

Sunset Bench - The sunset bench offers a bench style seat with a center table. The mount spans across the section underneath, spreading out the weight.

Bench - Made using our vinyl planks, our bench saves space on dock and has an optional arm-rest cup holder.

Rod/Drink Holder

This accessory offers something for everyone, this accessory works great as a drink holder, speaker stand, and especially at holding fishing equipment.

Aesthetics

Flag Pole Mount - Fly your favorite flags all summer long. The mount also fits Dorey Poles. Talk to your local dealership about ordering flags.

Flower Box - Mounted to the side of the dock and made from marine grade material, these boxes will last. They include drainage holes on the bottom that lead off the dock.

Shepherd's Hook - this hook will allow you to hang baskets, lanterns, or other lightweight decorations.

Storage

Dock Box

Store your boating equipment, fishing tackle, toys, and more in a convenient place. The lid doubles as a seat, and brackets mount it off of the dock top.

Dimensions: 50"x29"x29"

Sunset Dock Box

This box features a zip cover enclosure that protects your items from the elements. It similarly stores off the dock top, saving you deck space.

Dimensions: 45"x21"x24"

SUP Kayak Rack

With no drilling, these aluminum brackets will create a shelf style storing option for your dock. If interested, ask us about our single shelf kayak rack.

Standing Kayak Rack

Designed for on shore storage, this rack will house up to six kayaks or boards. The aluminum frame will weather the elements for years to come.

PERSONAL WATERCRAFT LIFT & SMALL BOAT LIFT

Looking for a personal watercraft or small boat lift? Between our three models, you can find the perfect fit. These lifts are built with the highest quality material to withstand the abuse of bigger lakes. Our Vertical High Lift even features 60 inches of travel for high energy lakes. All include superior soft vinyl bunks, aircraft quality aluminum, stainless-steel cables, oversized pulleys and stainless steel hardware.

BDL1351PWC

Bulmann Personal Watercraft Lifts provide a safe and convenient place to dock your personal watercraft. This lift features 36" of lift that prevents your craft from being knocked off by high waves or fluctuating water levels. Four PVC vertical guides are standard. The optional bow stop is a great way to position your PWC perfectly every time. Canopies are also available.

BDL1584SBL

The Bulmann Small Boat Lift's "A"-frame design makes it the sturdiest little lift on the market. This lift features 40" of lift that prevents your craft from being knocked off by high waves or fluctuating water levels. Several accessories are available to make this lift even more user friendly, including vertical guides, bow stop, and canopy.

BDL1362VHL

Designed for high energy lakes, these lifts offer more vertical travel than our standard lifts. 60 inches of travel perfectly suits high energy lakes, canals, and rivers with moderate water depth variations. The remote-controlled winch is solar charged, standard across all options on this model.

MODEL	CAPACITY	LIFT HEIGHT	BEAM WIDTH	LEG ADJUSTMENT	MIN. WATER DEPTH
BDL1351PWC	1300 LBS.	36"	51"	4@20"	12" + hull draft
BDL1362VHL	1300 LBS.	60"	62"	4@20"	13" + hull draft
BDL1584PWC	1500 LBS.	40"	84"	4@20"	12" = hull draft

DOUBLE HYDRAULIC PWC LIFT

HAVING FUN HAS NEVER BEEN SO EASY!

If you're tired of trying to hold your jet ski in place while jumping on the dock and cranking the wheel furiously before your watercraft floats out to sea, you need to consider Bulmann Dock & Lift's Double Hydraulic PWC Lift.

Our two place Hydraulic PWC Lift features push button operation with 6 guide posts and a bow stop to keep each PWC in perfect position every time! Super convenient button placement allows the operator to raise and lower the lift while they're seated on the watercraft. This is hands down the most user friendly PWC lift on the market. Bulmann Dock & Lift uses high grade aluminum, stainless steel hardware and cables, and custom pulleys. Our Hydraulic PWC Lift is built to stand the test of time! The Hydraulic PWC Lift can be made to accept 4', 5', and 6' wide dock sections for a walkway between the lifts. The standard size is 4' wide by 10' long.

STANDARD GUIDES & BOW STOP

Bulmann Dock & Lifts Hydraulic Double PWC Lift includes 6 vertical PVC guide posts and 2 vertical bow stop posts to consistently keep you in position while landing or launching your watercraft. These vertical guides and the push button operation allow one person to easily launch or land the craft, even in rough water.

OPTIONAL CANOPY

This extra deep canopy allows your PWC's to be tucked up & out of the sun's harmful UV rays. Every canopy comes with a standard built-in door that makes access and coverage second to none! Many fabric colors are available.

FREE STANDING

Another outstanding feature this lift offers is a great option for lakefronts that have shallow water for long distances. If you need a football field's length worth of dock to get to deep enough water, free standing this lift can save money by eliminating the need for such long docks. This unit has a built-in dock you can walk onto when you reach the lift. Plus, there's no need to run power cables to the lift because the power source is integrated on the lift. The solar panel will continuously maintain the battery's charge.

MODEL	CAPACITY	LIFT HEIGHT	DOCK WIDTH	LEG ADJUSTMENT	FRAME WIDTH	FOOTPAD WIDTH	MIN. WATER DEPTH
BDLPWCDBLH	1300 LBS. (2)	42"	N/A	4@27"	140.25"	142.25"	12" + hull draft
BDLPWCDBLH4	1300 LBS. (2)	42"	4'	4@27"	186.75"	188.75"	12" + hull draft
BDLPWCDBLH6	1300 LBS. (2)	42"	6'	4@27"	210.75"	212.75"	12" + hull draft

VERTICAL BOAT LIFTS

2,500 & 4,000 lb. Capacity

SOLID MATERIALS & SUPERIOR CONSTRUCTION

Our Vertical Shallow Water Boat Lifts are the best built lifts on the market. Standard double V side frame construction provides uncompromised strength and unobstructed accessibility. Additional diagonal bracing on the front and back prevent side to side swaying in strong winds. Lightweight aluminum construction along with stainless steel cables provide a rock solid structure that puts worrying to rest. Solid aluminum pulleys are mounted on custom machined stainless pins with grease fittings reducing wear on these vital components. This combination of top quality materials and superior construction is the reason a Bulmann Boat Lift will provide you with years of worry free use.

*Industry leading 2/16 boat lift warranty!
Bulmann Dock & Lift offers the best boat lift warranty in the industry. See dealer or manufacturer for details.*

MODEL	CAPACITY	LIFT HEIGHT	BEAM WIDTH	LEG ADJUSTMENT	OVER ALL WIDTH	MIN. WATER DEPTH
BDL2598M	2500 LBS.	54"	98"	4@36"	108"	5" + hull draft
BDL40108M	4000 LBS.	54"	108"	4@36"	121"	5" + hull draft
BDL40120M	4000 LBS.	54"	120"	4@36"	131"	5" + hull draft

Bulmann vertical boat lifts can accommodate much shallower water than most lifts. Our boat lifts are designed so that the lifting bed drops down inside the frame allowing it to sit on the lake bottom. This feature makes a Bulmann Boat Lift your best choice for shallow water conditions.

Large diameter, full width aluminum pulleys ensure long cable life and make cable derailment impossible.

All four legs are easily adjustable (36" of adjustment) and the adjustment bolts are located higher than most lifts so you are able to make adjustments without diving.

Custom machined stainless pulley pins have grease fittings to provide a lifetime of worry free use.

Vinyl bunks will not scratch the hull of your boat. There is no rotting wood or carpet to tear. These are truly maintenance free bunks.

These above features are found throughout all of our hydraulic lifts.

CLASS I VERTICAL HYDRAULIC BOAT LIFTS

4,000, 6,000 & 7,500 lb. Capacity

Our Vertical Shallow Water Boat Lifts are the best-built lifts on the market. Standard double V side frame construction provides uncompromised strength and unobstructed accessibility. Additional diagonal bracing on the front and back prevents side to side swaying in strong winds. Lightweight aluminum construction, along with stainless steel cables, provides a rock-solid structure that puts worries to rest. Solid aluminum pulleys mounted on custom machined stainless steel pins with integrated grease fittings reduce wear on these vital components. This combination of top quality materials and superior construction is the reason a Bulmann Boat Lift will provide you with years of worry-free use.

NOTABLE FEATURES

- Remote controlled. One person can easily operate the lift and either launch or land their boat.
- Fast and quiet operation.
- Hydraulic cylinder and integrated power source are located above the water, self contained on the lift and protected from the elements.
- A single hydraulic cylinder provides the force to smoothly and efficiently lift your boat out of the water.
- Cables aren't wound or wrapped. The stainless steel cables move around large diameter pulleys, eliminating cable on cable contact, providing maximum life.
- A new safety standard! A welded counter balance valve adds additional hydraulic safety for your investment.

MODEL	CAPACITY	LIFT HEIGHT	BEAM WIDTH	LEG ADJUSTMENT	OVER ALL WIDTH	MIN. WATER DEPTH
BDL40108H	4000 LBS.	56"	108"	4@31.5"	121"	5" + hull draft

BDL75132VHL	7500 LBS.	80"	132"	4@34.5"	147"	6.5" + hull draft

Remote Controlled and Solar Charged!

Think inside the box! That's what we did when we designed this attractive housing. A high-density polyethylene cover offers excellent protection and easy access to the battery and motor while also providing a clean look. It not only protects the motor and battery from the elements but looks good doing it! The cover can be removed by merely unhinging four rubber latches. Once removed, the vital components are exposed if service is needed.

The hydraulic cylinder design features a welded counterbalance valve. This valve locks the cylinder and helps to prevent drifting or retraction when not in use. This new safety feature is standard on all of our class 1 hydraulic boat lifts. With the cylinder located out of the water, protected from the elements, and not obstructing the lake bottom, this design allows the lifting bed to lower further than other models. This feature also makes our lift the best option in shallow water situations. Keeping hydraulic components out of the harsh marine environment extends cylinder life and keeps maintenance to a minimum.

V side frame construction provides unobstructed accessibility for boarding your boat.

All four legs are easily adjustable (36" of adjustment) and the adjustment bolts are located higher than most lifts so you are able to make adjustments without diving. Square tubing helps to ensure the leg will not turn and the holes will line up.

Diagonal bracing on the front and back prevent swaying side to side in strong winds.

Custom machined stainless pulley pins have grease fittings to provide a lifetime of worry free use. Large diameter full width aluminum pulleys insure long cable life and make cable derailment impossible.

CLASS II VERTICAL HYDRAULIC BOAT LIFTS

10,000, 14,000, 20,000, 26,000, & 32,000 lb. Capacity

What sets the patented Bulmann Vertical Hydraulic Lift apart from the competition is that all of the moving parts are out of the water when raised. The hydraulics and electrical components are all self-contained and covered to provide a clean appearance. Covered moving parts and electrical accessories offer a level of safety that is second to none. Bulmann Vertical Hydraulic Lifts offer an array of user-friendly controls and accessories. All hydraulic lifts come standard with two remote control key fobs so you can operate your lift from the boat or on the walk down the dock. Another convenient standard feature is the night time docking light, also activated with the remote control.

Why keep your boat miles away at the marina? Why fight summer traffic to go boating? Buy a Bulmann Boat Lift and have your boat ready as soon as you walk out your door!

THE BULMANN LIFTING SYSTEM!

Hydraulic pump supplies the brute power necessary to lift your boat out of the water.

Hydraulic cylinders are out of the water and protected from the weather, minerals and marine organisms.

Stainless steel cable will never rust or corrode.

Solar maintained DC battery power is safer than exposed 110 or 220 volt AC extension cords found on other lifts.

Billet aluminum lifting pulleys with bronze bushings and greasable stainless pins will provide a lifetime of worry free use.

Total aluminum housing protects the vital components.

Bulmann vertical hydraulic lifts can accommodate much shallower water than most hydraulic lifts. This is because the boat is raised up with hydraulic cylinders that are mounted at the top of the boat lift. Also, the lift beams drop down inside the frame making this lift your best choice for shallow water conditions.

*Industry leading 2/16 boat lift warranty!
Bulmann Dock & Lift offers the best boat lift warranty in the industry. See dealer or manufacturer for details.*

Some Class II Hydraulic lifts are built to order. Plan ahead and allow time for fabrication and delivery.

BOAT LIFT ACCESSORIES

Bulmann's Worry Free Solution to Landing and Launching

The Ultimate Guide System

This system puts you in the captain's seat. Even during rough water and high wind conditions, this system will protect your boat and lift by correctly positioning the boat onto the bunks. Our guides begin beyond the lift and actually "catch" and straighten the watercraft before it's in the lift.

Vertical PVC posts only touch the rub rails of a boat, and guide the lift straight to the bow stops. This system's width can be adjusted to your boats dimensions. This ensures a correct position in the lift every time you use it. Landing a boat on a lift without Ultimate Guides during a storm could cost you more than just a wet deck!

By positioning the rear guides behind the canopy, your boat and lift cannot collide. The rail the guides sit on is adjustable. The Ultimate Guide system can be fit to your boats exact size.

PONTOON ULTIMATE GUIDES

Pontoon ultimate guides provide the best protection for your pontoon boat when entering the lift. These short, vertical PVC tubes contact the inside of the pontoons guiding your boat to the center of the lift. These guides also include a bow stop which is the best way to stop your boat in the correct position every time. These guides are adjustable and can be fit to your boat.

8 POST GUIDES

Our 8 Post Vertical Guides provide great protection for your boat. These vertical PVC guides only contact the rub rail of the boat, preventing the hull from making contact with the frame. The width between the guides is adjustable for perfect positioning every time. Recommended for moderate wind and wave conditions.

BOW STOP

Bow stops are the best way to stop the boat in its correct position. Vertical PVC posts allow the boat to move up and down in rough water conditions making contact with only the boats rub rail.

Horizontal Guides

An alternative guide system for pontoons, the horizontal guides catch the outside of the toons. A bow stop is recommended with this.

ULTIMATE GUIDE STEP

Getting on and off the boat can be difficult for some. This adjustable step is perfect for bridging the gap between boat and dock.

WHEEL BRACKETS & SPINDLES

An installation essential. Wheel brackets attach to the lift frame and stay on year round. These brackets provide a place to connect a wheel with a spindle to make installation much easier.

CANOPY

Our canopies maximize the amount of coverage for your boat. By design, Bulmann canopies offer more depth than the industry standard. With this deep frame construction, we can provide your watercraft with better protection from the sun's damaging rays and driving precipitation. Installing a Bulmann canvas is a breeze! Just pull the attached bungee cords over the buttons on the frame, and you're covered. Our canopies are made with TOP GUN™ fabric, which is an acrylic-coated 100% woven polyester material. The deeper construction of our standard canopy frame combined with TOP GUN™ fabric will provide your boat with excellent protection from the elements.

HIGH RISE CANOPY

Our often imitated High Rise Canopy offers the ultimate in protection for those hard to cover high profile boats. This unique and stylish design features a rear door that opens to allow the vessel to enter or exit the lift. With the door closed and the boat raised, the High Rise provides superior protection from the elements. Keeping your boat looking new from bow to stern. The High Rise Canopy is excellent for watercraft with wake-board towers, radar arches, bimini tops, and boats with tall center consoles. Ask about our new powered rear door option! Great for outboards and stern or aft areas that are hard to maneuver around.

CANVAS COLOR SELECTION

Our color selection is second to none! With 20 colors to choose from we have more options than you can shake a stick at! Please note that color swatches are an approximation. To see the exact color of the fabric, please request a sample card.

CANOPY BIRD STOP POSTS

Our canopy bird stop posts provide a place to tie bird line above your canopy. This barrier helps deter seagulls and other waterfowl from landing. Bird stop posts are the best option for keeping your canvas clear of bird droppings.

OUR STORY

In 1998, Bulman Dock & Lift was founded by Steve and Becky Bulmann. What started as any other installation company quickly grew into something distinctly different from anyone else. Steve's years of experience with products from other manufacturers allowed him to identify a need in the market. His customers on Lake Charlevoix, MI wanted more out of their lakefront living experience. Steve set out to develop better products with these critical factors in mind: appearance, ease of installation and removal, low maintenance, longevity, user-friendliness, and value.

In 2001, Bulmann Dock & Lift was able to move from Steve and Becky's pole barn to lease a dedicated manufacturing facility in Boyne Falls, Michigan. Here, Bulmann began its endless journey to sharpen its manufacturing ability. The product line quickly expanded to include boat lifts, and with it came the start of an exceptional team of employees dedicated to providing the best customer service possible. This was the foundation for our culture today.

In the fall of 2013, the company was able to purchase a much larger facility in Boyne City, Michigan. Since that purchase the facility has seen three major additions. The first was completed in 2018, and the second finished in the fall of 2022. Over the years, our dealer network has expanded across the Midwestern United States, and even internationally into Canada.

Here at Bulmann, our core culture has built it all. Steve Bulmann's motivation for creating BDL began with a desire to provide for the future family he wanted to create with wife, Becky. Our purpose today is to provide career opportunities that enable the means to a good quality life for team members, and to provide unparalleled support for dealers. In simpler words, to provide for the family. Today, that family includes many more than those with the Bulmann last name. We hope we can welcome you to the family soon.

Team Bulmann
